Eisenhower Matrix

	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Users can create an emoji group ● Users can add specific emojis from a Slack organization into an emoji group ● Users can access emojis groups and access their emojis	**Schedule - (For V2.0+)** ● User can remove emojis from emoji groups ● Users can delete emoji groups ● The extension is able to accurately detect and alert the user if its running out of storage for the emojis
Not Important	**Delegate - (Use a library)** ● The UI is usable and intuitive (will probably use Bootstrap for this) ● The extension automatically fetches the image of the emoji, such that the user doesn't have to manually upload it ● Emoji groups are locally saved in the web browser (will use the local storage Chrome API)	**Delete - (Cut it)** ● Users can export emoji groups (such that they can share it with friends) ● Users can import emoji groups ● Multiplatform-support: the extension can also be used for websites such as Discord
